

## Project Description:

COMALAT is a language learning system for *Vocational Education and Training (VET)*. COMALAT provides learning material as an innovative *Open Educational Resource (OER)* and is capable of self-adapting to the needs and goals of different types of learners. Each of the learners is treated *individually* by the system to build job-oriented competences and new language skills. Therefore, a section with language for specific purposes is included in every lesson within the learning materials provided by the system.

In comparison to existing language training platforms, COMALAT provides OER materials and addresses the limitations of traditional learning settings in relation to the *availability* and *integration with emerging technologies* and devices such as smart phones and tablets. In addition, it is specifically tailored towards addressing competence areas, and therefore it is not a generic language learning platform. COMALAT will be available for free for everyone, in the form of web-based solution and an application on smart phones. In addition, it will be provided as open source software to allow future extensions, with the goal of building a community around the system that will support it after the project ends.

## Project Target Group:

- Youth, adults and (low-) skilled workers in the European Union (EU) in order to boost their mobility in EU.
- Public Language Training Centers and VET providers in facilitated and ICT based training.

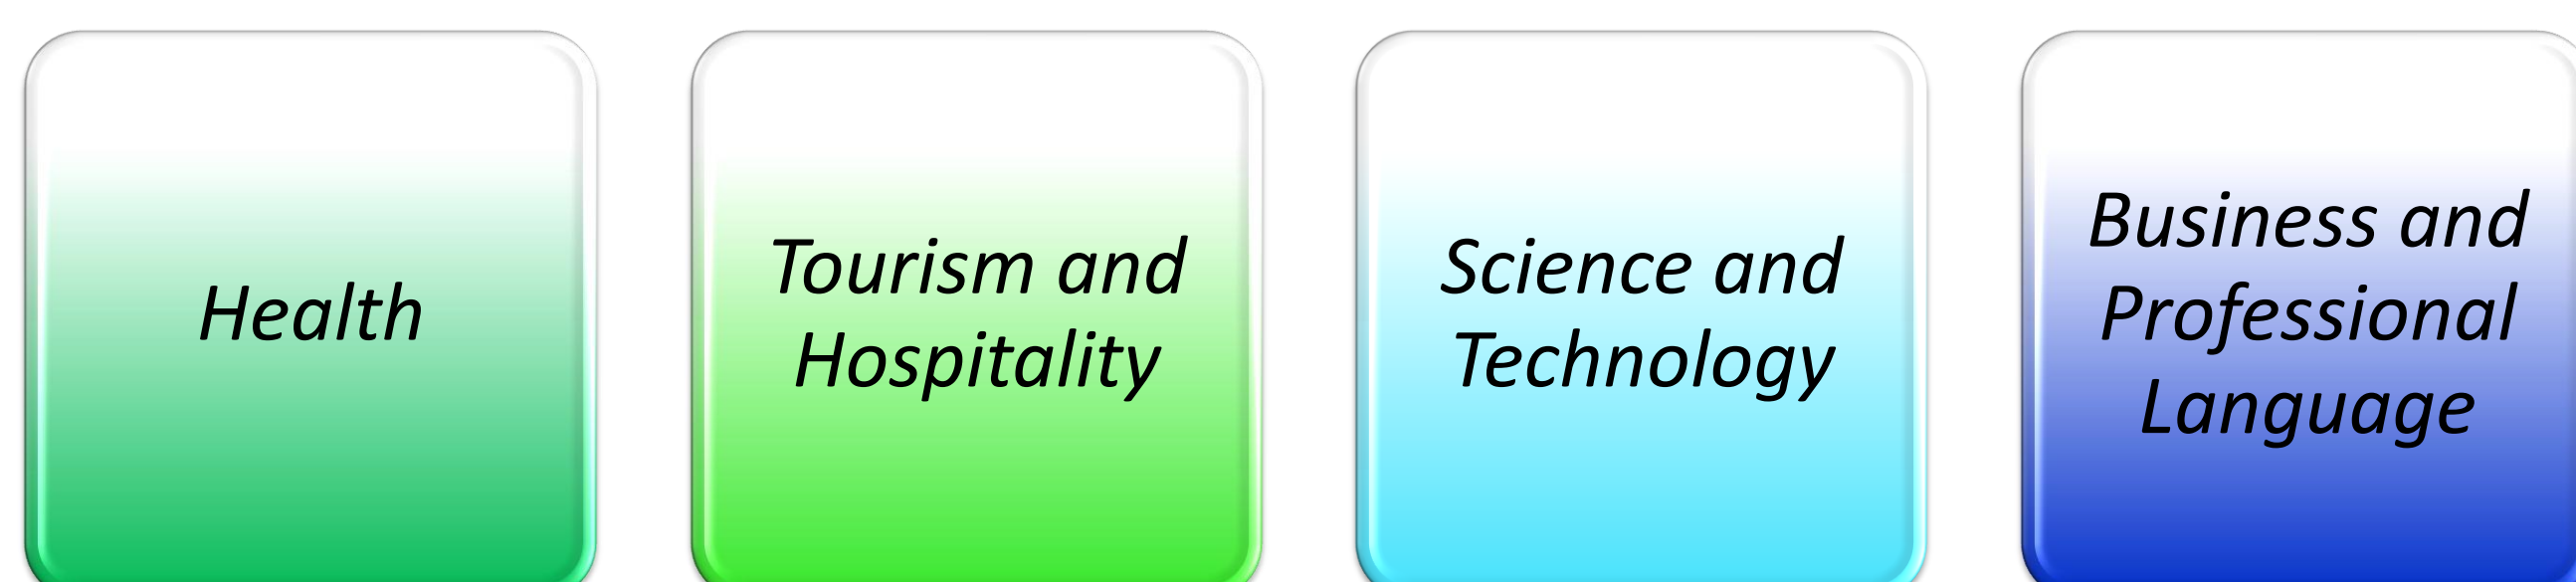

## Project Objectives:

- Improve the language proficiency of end users in a competence and goal oriented manner by considering their limitations, priorities and progress.
- Increase the mobility of youth and labor force in EU.
- Improve the cultural adaptations of the end users.
- Support for the languages of the most favorable countries in job markets i.e. English, German and Spanish
- Increase the efficiency and speed of the learning process through online as well as offline mode via an app for smartphones

## Expected Project Results:

- Project Portal and Software
- Web-based Training Platform
- App for smart phones and tablets
- Individual learning experience with different learning paths through customized learning materials
- Open Educational Resources (OER) for job specific language training
- A project specific community that will support end users after the project lifetime

## Job Specific Application Domains:

## Project Information:

- Project start: 01.09.2014
- Project duration: 3 Years
- Website: [www.comalat.eu](http://www.comalat.eu)
- Grant agreement No. 2014-1-DE02-KA200-001589
