

## Competence Oriented Multilingual Adaptive Language Assessment and Training System

Mockup of COMALAT System User Interface: “Evaluation and Recommendation”

- ✦ Test Evaluation and Recommendations
- ✦ Overview about the latest activities

Mockup of COMALAT system User interface: “My Progress”

- ✦ Track the own progress in every competence
- ✦ Self-evaluation and progress monitoring
- ✦ Overview about the current exercises

*COMALAT is a language learning system for vocational education and training (VET) and offers learning materials as an innovative Open Educational Resource (OER). COMALAT is self-adaptive and depends on the preferences of end users. The main focus of the platform is the improvement of job-oriented language competences. The project result is published as open source software.*

## PROJECT AND CONTACT INFORMATION

- ✦ Project duration: 01.09.2014 for 3 years
- ✦ Project reference: 2014-1-DE02-KA200-001589
- ✦ Postal address: Department for Electrical Engineering and Informatics, University of Siegen, Hoelderlinstr. 3, D-57076 Siegen, Germany.
